NEW HEADPHONE AMPLIFIER FROM CREEK AUDIO

The OBH range of miniature products (phono pre-amps, headphone amps, passive pre-amp) have always been great sellers.

In recent years Creek Audio upgraded the range from the small black models to a slightly elongated version in a catching silver fronted case.

However there has been continued pressure on Creek to re-introduce its smallest headphone amplifier – the OBH 11.

With upgraded circuitry and a greatly improved cosmetic Epoz is happy to announce that this new model is now available in Australia. Full details can be found in the product page.
