AktiMate Mini now available in red

Demand for the Mini to be supplied in red has been escalating in recent months – from countries all over the world.

As a consequence, Epoz is happy to announce that production is now complete and red joins the line-up effective immediately.

Rather than staying with what we believed to be an over-powering all red look, the decision was made to retain certain elements in black – i.e. control and iPod dock. The comments on this styling have been 100% positive.
