

October 2009

AktiMate Maxi released

There has been talk of a bigger brother for the AktiMate Mini since day 1.

At last it's here. And bigger brother it certainly is with features including internet radio, FM radio, wireless streaming, two RCA inputs, an RCA out, Ethernet connection, 3.5 mm input, display and of course the new style concealed iPod dock. All features can be seen on the product page.

The Maxi will also be available in a real wood walnut finish in addition to the high gloss black and red.
